

Indigenous Water Governance Workshop:

Indigenous Water Governance (1 hour): for schools

- The sacred relationship with water
- Different ways of thinking about water
- Challenges from extractive industries
- Introducing water monitoring techniques
- Youth perform water testing exercise

Our facilitators are available to help groups and individuals learn water testing techniques

Indigenous Water Governance for adults

- Includes all of the information above
- How water protection corresponds to Treaty rights
- More about the Canadian Aquatic Bio-monitoring Network and bio-assay technique, including training opportunities
- More about the Groundwater Data Visualization tool
- Introducing the concept of 'personhood' for water bodies around the world
